Objectives & Curriculum

The LA&HA Master's Program in Laser Dentistry is an educational curriculum designed by the Laser and Health Academy to provide participants with a comprehensive level of knowledge about basic and in-depth laser principles as well as the skills and competency needed for using Fotona dental laser systems in a range of dental specialties. Participants are required to have a DDS diploma, at least 3 years of experience in dentistry and 1 year of experience in laser dentistry. During the Program, participants are expected to gain advanced knowledge, skills and the confidence to use a Fotona dental laser system safely and successfully in their dental practices.

The program consists of theoretical lessons, hands-on activities, individual study, as well as the observation and performance of live clinical operations. After each module, the participant's learning improvement is assessed by examination. By the end of the program, participants are required to perform and present their own laser-assisted clinical cases from among all dental specialties.

After successful participation in the LA&HA Master's program and clinical case presentations, participations will receive the following title issued by the Laser & Health Academy:

LA&HA Master in Laser Dentistry

The award ceremony takes place every year during the LA&HA Symposium.

Duration

Participants can finish the LA&HA Master's Program within one year, in five modules for 3-4 days at a time. There is also an option to extend attendance over a maximum of three years. This modular approach enables participants to implement their knowledge and skills in the dental office immediately after each module.

Lecturers

LA&HA provides the most qualified speaker for each topic from a pool of experienced LA&HA lecturers and university professors who are cooperating in a variety of workshops and seminars offered by LA&HA.

Obtaining MSc degree

LA&HA Master graduates who wish to continue their education may proceed directly to the second year of study in the 2-year International Master in Laser Dentistry program of the Universita Cattolica del Sacro Cuore in Rome, Italy to obtain the academic title of MSc in Laser Dentistry.
